

market economy, and integration into European and transatlantic institutions.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

#### GENERAL LEAVE

Mr. GILMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on House Concurrent Resolution 400, the matter just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

#### PASS THE VIOLENCE AGAINST WOMEN ACT

(Mrs. MALONEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MALONEY of New York. Mr. Speaker, over 900,000 women suffer violence each year at the hands of an intimate partner. We need the Violence Against Women Act to be reauthorized. It has provided over \$1.6 billion in Federal grants to prosecutors, to law enforcement officials, and to victim assistance programs; yet it was allowed to expire this past weekend.

Last week, this body passed it overwhelmingly. There is deep support in the Senate, with over 70 co-sponsors. Yet the Senate is holding this important piece of legislation up. Meanwhile, women fleeing domestic violence and children who live in violent situations wait and wait and wait.

I urge the other body to pass this bill immediately. Women and children around this Nation are counting on us. We should have passed it in the other body last week. We should not have allowed it to expire.

#### VITAL LEGISLATION NEEDS ADDRESSING BEFORE CONGRESS ADJOURNS

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, I want to offer my support for moving along the Violence Against Women Act. I believe that we have more than an important responsibility to deal with this legislation. As Chair of the Congressional Children's Caucus, I can tell my colleagues of the terrible and horrific results that come from a child that has experienced violence in the home.

In addition, Mr. Speaker, I think it is vital that we spend these last waning hours to address the question of a pa-

tients' bill of rights to address the question of a guaranteed Medicare drug prescription benefit for seniors. Having come from my district, I know what people are crying out for.

I also believe, Mr. Speaker, that as we have seen three recent votes on the floor of the House this evening, it is imperative when we look at serious issues dealing with privacy and violence against women that we have hearings and the opportunity to deliberate and add amendments to the bill so we can put forward to the American people important and vital and serious and valuable legislation.

Mr. Speaker, I think that the American people are not expecting us to be the "do-nothing" Congress. They, frankly, want us to do our jobs.

#### SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 1999, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

#### WIND FOR ELECTRICITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. FILNER) is recognized for 5 minutes.

Mr. FILNER. Mr. Speaker, I represent San Diego, California, which is undergoing a tremendous crisis in terms of the price that we pay for electricity. In the last 3 months, prices have doubled and tripled. And while we have a short-term cap on those prices, we are looking to Congress to bring down the wholesale price of electricity and bring down the rates to consumers and small businesses.

Tonight, I want to speak about the long-range issue of energy and how that affects San Diego and the rest of our Nation. We all know that oil, natural gas, and home heating fuel prices are at a 10-year high. American consumers are facing record increases in domestic energy costs. This past summer households have been hit by soaring electricity rates in California, and motorists have faced astronomical gasoline price hikes. Now, in the coming winter months, high energy prices will affect households throughout the country.

The economic consequences are all too evident to individual consumers both at home and overseas. In Europe we see gasoline shortages, panic buying, and massive protests over rising prices. Furthermore, the impact does not stop with the individual consumer; the whole Nation bears the consequences. A surge in the price of energy can derail the economic expansion that we have worked so hard to achieve and maintain.

I think we know that energy supplies and prices are indeed cyclical. We have

been lulled into inaction by the long downside half of that cycle. Oil and gas have been in adequate supply and the moderate energy prices have made us forget the upside of that cycle. The energy crises of the 1970s and 1980s are forgotten history. Consequently, we have failed to implement policies to increase our energy supplies and to promote stable prices. We have steadily grown more dependent on conventional and imported energy. Congress has done very little to protect the Nation from the inevitable upswing in that cycle.

In particular, we have failed to support the development of alternative energy resources. In terms of domestic resource potential, wind energy is the most overlooked fuel source in this Nation. This resource is available in almost every State and can be utilized for electric generation more quickly than any other energy resource. Although California has been a leader, other States, such as Wyoming, Wisconsin, Vermont, Texas, Pennsylvania, Oregon, New York, Minnesota and Iowa, are beginning to utilize their wind energy resources. The use of wind power for electric generation is slowly growing.

Compared with the tax incentives for conventional nuclear energy, Federal tax support for renewable energy resources, such as wind, is relatively small. Aside from accelerated depreciation, which is shared by other fast-evolving technologies, wind facilities now qualify only for a temporary Federal production tax credit. This credit helps provide a price floor, but if the price of wind-generated electricity rises above a certain benchmark, the tax credit phases out and this credit took effect in 1994.

It was originally decided to sunset this credit in June of 1999. But several years after the credit was enacted, Congress considered repealing it when energy prices were at an all-time low. Fortunately, Congress retained the credit and later extended it until 2002. Despite waiving congressional policy, the credit has promoted use of domestic wind energy resources and has promoted technological development.

An uncertain credit and a temporary extension, however, does not support long-term planning, development and construction of electric generation projects. The experience with another credit program proves my point. Between 1986 and 1992, when the section 48 solar and geothermal credit was finally made permanent, Congress extended this credit in 1-, 2-, and 3-year increments. Sizable projects could not be undertaken because of the short eligibility period; and small short-term projects that were attempted had to be rushed to completion at great cost to meet the qualification deadline. For both policy and practical reasons, the wind production credit should be made
